PRODUCT DESIGNER (UX/UI)
UX FOR ENTERPRISE SOLUTIONS, AI AND AUTOMATION | USER RESEARCH | DATA-DRIVEN DESIGN | DESIGN THINKING

PROFESSIONAL SUMMARY

Product Designer (UX/UI) with over 5 years of experience designing digital experiences for software, automation, and artificial intelligence products.

I have worked in high-performance business environments, particularly in the energy and utilities sector, where experience design is a key enabler for adoption, operational efficiency, and value creation. I have experience designing workflows, interfaces, and information architectures for platforms with multiple integrations and business rules.

My unique strength lies in designing experiences for enterprise systems, understanding both user interaction and business processes, operational workflows, and the technical logic of the solutions. This allows me to contribute to products where software, data, automation, and artificial intelligence converge.

I work end-to-end throughout the design cycle, from problem discovery to solution validation, collaborating with multidisciplinary product, development, and business teams.

HIGHLIGHTS

- Design of enterprise platforms with multiple integrations
- Experience with artificial intelligence and automation solutions
- Design of complex operational workflows
- Facilitation of discovery and co-creation workshops
- Working with multidisciplinary teams

ABILITIES

Core UX

- User Experience (UX)
- User Interface (UI)
- User Research
- Interaction Design
- Information Architecture

Product and Strategy

- Product Design
- Design Thinking
- Jobs to Be Done
- Customer Journey Mapping
- UX for Enterprise Systems

Technology and Tools

- Figma
- Adobe XD
- Miro
- Azure DevOps

Differentiators

- UX for AI systems
- UX for process automation
- UX for enterprise platforms

Languages

- Spanish (hablante nativo)
- English (B2)

Professional Experience

Global MVM, Medellín, Colombia **2021 - 2026**
UX/UI Designer: Designing user experiences for complex digital platforms in the energy and business sectors.

Responsibilities

- User research and understanding business needs
- Designing user flows and interactions for web and mobile applications
- High-fidelity prototyping (Figma, Adobe XD)
- Facilitating discovery workshops with stakeholders
- Defining design components and guidelines
- Integrating UX into solutions involving analytics, automation, and artificial intelligence

Work Approach

- User-centered design applied to complex digital products
- Collaboration with development and business teams in iterative cycles
- Participation in defining requirements and functional prioritization
- Design focused on improving efficiency, usability, and adoption

Applied Design Practices

- User flows & task flows
- Wireframing & prototyping
- Design systems and reusable components

- UX for complex operational workflows
- Design for platforms with multiple user roles

Impact generated

- Improved usability and adoption of enterprise platforms
- Simplification of complex workflows in energy sector systems
- Alignment of business needs with digital solutions

Notable Projects

- **XM:** Bankgar, Sinergox, SIO, Paratec, Fronteras, SINTEC
- **EPM:** Cuponeras, Análisis predial, Alquiler de infraestructura, Reclutamiento, GenIA
- **Triple A:** board of directors
- **Aguas Nacionales:** Automation of field supervision
- **Global MVM:** MVM Energy Suite, Hojas de Vida, UX Tool Kit, website refactoring
- **Emdupar:** billing system

Open Innovation S.A.S, Medellín, Colombia **2020- 2026**

UX/UI Designer (Freelance): Consultant in experience design and innovation processes

Responsibilities

- Design and facilitation of Design Thinking workshops
- Identification of digital opportunities within organizations
- Conceptual-phase experience design (UX flows, prototypes)
- Training in design tools (Figma)

Focus

- Facilitating discovery processes
- Defining business problems
- Co-creation with stakeholders

Featured Projects

- **Focus Safe product:** User experience design, workflows, and prototypes
- **Ibagué Chamber of Commerce:**
    - Identification of technological challenges
    - Design of innovation workshops
    - Conceptualization of digital solutions

Leds Do It, Medellín, Colombia **2019 - 2025**
Lighting Experience & Prototyping Assistant (Voluntary / Personal Project):
Voluntary participation in the design, prototyping, and implementation of lighting solutions for events, as a personal initiative focused on exploring visual experiences and technical setup.

Education

Industrial Designer – **Universidad Pontificia Bolivariana (2021)**
Practical UX Design Course - **El Tiempo (Publishing House)(2023)**
